## Invitation

It gives us immense pleasure by inviting and welcoming you cordially in National Seminar on Emerging Trends in Biological Sciences in light of Environmental Degradation and Life Sustainability, organized by The Department Of Zoology, Pandit. S. N. Shukla University, Shahdol (M. P.).

Environment sustainability as well as biodiversity conservation are the major concern for biologists and environmentalists due to unwilling and anthropogenic interference since long similarly, the global industrialization and chemitoxicological development to posing serious threats to biotic components of almost all surviving ecosystems. The biodiversity is facing its own survival & sustaining environment has become least secured.

However many resolutions have been evolved to cope with such challenging situations yet much more has to be worked out.

The chief objective of this scholarly arena is to research and draw some new trends and derivations for sustaining environment as well as conservation of biodiversity. The Department of Zoology has been the pioneer department in this University since its inception. The department is extraordinarily providing Masters degree in Zoology, Biotechnology, Fisheries & M.Phil & Ph.D. in Zoology to the aspiring students.

Shahdol is one of the historical city of Madhya Pradesh & is very close (75 km) to Bandhavgarh National Park (ancient home of white tiger) and 120 km to Amarkantak valley ( place of origin of river Narmada & Sone). Shahdol is located on south eastern central railway and is well connected to Bilaspur eastward and Katni Jabalpur westward and the nearest airport is in Jabalpur.
